Abstract

This article is about learning LYX, cool features are explorered here.

This is my first LYX document!

1 Introduction

This is an introduction to my first LYX[1] document.

2 New section

3 About this document

Sections and subsections are described below[2].

If you want to know more about this document, then see section 3.

See 3.

Margin notes

3.1 Section Description

Sections are bigger than subsections.3

3.2 Subsections description

Sebsections are smaller than sections.

subparagraph

---

[1] LYX is a typesetting word processor.

[2] some note

One more not numbered section

3.3   Not numbered section not calculated into numbers

4   More stuff

LYX is the better than other word processors because:

Typesetting is done for you.

    SubList is okay

Math is WYSIWYG

Lists are very easy to create!
    Using the protected break to list more than one paragraph!
